Antacid And Oxetacaine Oral Suspension

Antacid and Oxetacaine suspension is ineffective if administered down a enteral feeding tube. Use with caution in patients who are strictly 'nil by mouth'. Drinking anything immediately afterwards should be avoided to prevent the antacid/oxetacaine suspension being washed away before the local anaesthetic has had the desired effect.

ANTACID and OXETACAINE ORAL SUSPENSION

Why have I been prescribed Antacid and Oxetacaine Suspension? Oxetacaine is a topical anaesthetic, which effectively relieves pain when applied to the lining of the mouth and food pipe. The antacids neutralize stomach acid and prevent further irritation of the food pipe. Antacid also thickens the liquid to help carry the oxetacaine and coat the food pipe. Before you start using Antacid and Oxetacaine, tell your doctor if any of the following apply:
