Although this program is free, you'll need to be an Amazon Prime member to take advantage of it. If you're not a member you can sign up for a free trial of Amazon Prime or wait until they offer free subscriptions, which they do from time to time for special groups of people like moms or students.

Apple Powermac G4 Cube Service

The Cube boasted a 450MHz or 500Mhz G4 CPU, wich was faster than entry-level PowerMac G4s of the same year. While this clock rate is significantly lower than the competing intel chipsets of the time (1.3 Ghz Pentium 4 at the high end), the Cube's G4 featured an AltiVec module and a more efficient architecture (RISC vs CISC), making the PowerPC chip faster than an Intel CPU running at the same clock speed.

The Power Mac G4 Cube is a small form factor Macintosh personal computer from Apple Computer, Inc., sold between 2000 and 2001. Designed by Jonathan Ive, the Cube was Apple's attempt to miniaturize a powerful desktop computer into a cube less than 8 inches to a side. Apple's designers pioneered new technologies and production to create the product, which Apple aimed at consumers in between the consumer iMac G3 and the professional Power Mac G4. Despite winning awards and plaudits ...
