Land art, variously known as Earth art, environmental art, and Earthworks, is an art movement that emerged in the 1960s and 1970s, largely associated with Great Britain and the United States but that also includes examples from many countries. As a trend, "land art" expanded boundaries of art by the materials used and the siting of the works. The materials used were often the materials of the ...

A work of art is often more disclosive of human life in general than of the specific life of the artist. It may disclose something about the state of mind or the attitude of the artist, but a work of art will only be great if its "spiritual content is liberated from its creator" (ca. 1910/SW.III, 228).
