† Adopted an ASTM umbrella bolt specification, ASTM F3125, that includes Grades A325, A325M, A490, A490M, F1852 and F2280 † Adopted new ASTM HSS material specifications, ASTM A1085/A1085M and A1065/ A1065M, that permit use of a design thickness equal to the full nominal thickness of the member

Specification for Structural Steel Buildings

Metallography procedures were carried out according to the ASTM-E3 standard . They were first ground using 220, 320, 400, and 600 grit silicon carbide (SiC) papers with light contact pressure to obtain a planar surface free from deep grooves. The polishing procedure was then performed using 0.05 µm colloidal silica with water.
