In 2012 Eagle licensing changed to FlexNET Publisher (FNP) systems. Both HaspID and FlexLM licensing are now EOL (End of Life) and phased out. We do encourage users continuing to use our product to move to the FNP. There is a new Licensing Guide for developers and administrators which is available from the link on this page. Do I need a driver?

License Administration Guide - utoledo.edu

The ability for FLEXnet Licensing to produce diagnostic output is controlled by your software vendor. FLEXLM_DIAGNOSTICS is an environment variable that causes the application to produce diagnostic information when a checkout is denied. The format of the diagnostic information may change over time. On UNIX, the diagnostic output goes to stderr.
