were officially produced, but I have definitely seen versions with no top light, and versions with no bottom light. There is also the "Pol" version , with a circular stage and polarization components installed.

Nikon Optiphot Series Microscopes

Nikon's Optiphot-88 integrated circuit inspection microscope entered into the marketplace around 1987, supplanting the Optiphot-66 and its 6-inch by 6-inch stage. Among the many primary improvements in the instrument's design was an increase in stage size that enabled the inspection of 8-inch silicon wafers.

Nikon Microscopes Models Review: Optiphot, Labophot Eclipse 50i and E100. From the time the first Nikon compound monocular microscopes were produced in 1917, Nikon microscopes continued to evolve over the next seven decades; in the late 1970s and early 1980s, they introduced the Optiphot and Labophot models. Many labs and schools still choose to use these older, durable models.
