RCA adopted CMOS for the design of integrated circuits (ICs), developing CMOS circuits for an Air Force computer in 1965 and then a 288-bit CMOS SRAM memory chip in 1968. RCA also used CMOS for its 4000-series integrated circuits in 1968, starting with a 20  $\mu\text{m}$  semiconductor manufacturing process before gradually scaling to a 10  $\mu\text{m}$
