With acoustic neuroma, hearing loss is often accompanied by ringing in on ear-- "tinnitus". The hearing loss is usually subtle and worsens very slowly over a period of time. In about 5% of cases, there may be a sudden loss of hearing. Some patients may experience a sense of fullness in the affected ear.

Acoustic Neuroma: Symptoms - Hopkins Medicine

Methods: Consistent with the American Academy of Otolaryngology-Head and Neck Surgery Foundation's "Clinical Practice Guideline Development Manual, Third Edition" (Rosenfeld et al. Otolaryngol Head Neck Surg. 2013;148[1]:S1-S55), the guideline update group was convened with representation from the disciplines of otolaryngology-head and neck ...

Clinical Practice Guideline: Sudden Hearing Loss (Update)

Many vaccine-related adverse events are associated with otolaryngologic manifestations. In particular, the incidence of sudden sensorineural hearing loss (SSNHL) was examined after influenza vaccination in a large-scale study that demonstrated no association between vaccination and the rate of SSNHL. 1 Anecdotal reports are rapidly emerging from the otolaryngology community of SSNHL occurring ...
