The Chevrolet "big block" engine is a term for a series of large-displacement, naturally-aspirated, 90°, overhead valve, gasoline-powered, V-8 engines; that were developed and produced by the Chevrolet Division of General Motors, from the 1950s until present.. Chevrolet had introduced its popular small block V8 in 1955, but needed something larger to power its medium duty trucks and the ...

### Chevrolet big-block engine - Wikipedia

The intake manifold on the Vortec 8100 is of cast aluminum, but the block and head of this engine are still made of cast iron in an industry that is otherwise moving steadfastly to aluminum alloys. The compression ratio on this generation of engine was typically 9.1:1, and HP up to 330 HP and 450 ft. lbs. of torque.
