Alcohol And Drug Abuse Emotional

Alcohol is consumed to elicit several desired effects: coping/masking of feelings, pain reduction, lifting mood, relaxation, lifting of inhibitions/social acceptance. Relying on alcohol consumption to bring about these different emotional effects can lead to alcohol abuse or alcoholism. Alcohol abuse or alcoholism are terms that are used interchangeably but have different meanings.

Emotional Effects of Alcohol | The Recovery Village

Addiction grows in a bed of pre-existing emotional turmoil, and the feelings of anxiety, shame, guilt, and worthlessness that increase risk for addiction will only become worse as the chemical dependency deepens. Drug abuse also creates fresh emotional complications for everyone it affects. Emotional pain and disruption is inevitable for drug addicts and their loved ones, and only through treatment and recovery can families escape the pernicious effects of chemical dependency.
