The Plague - The Black Death Essay - 1429 Words | Bartleby

The Black Death was one of the most devastating pandemics in human history, peaking in Europe between 1348 and 1350. It is widely thought to have been an outbreak of plague caused by the bacterium *Yersinia pestis*, an argument supported by recent forensic research, although this view has been challenged by a number of scholars.

Black Death - Saylor Academy

was a widespread epidemic of the Bubonic Plague that passed from Asia and through Europe in the mid fourteenth century. The first signs of the Black Plague in Europe were present around the fall of 1347. In the span of three years, the Black Death killed one third of all the people in Europe. This

The Black Death - Marquette University

The Black Death (also known as the Pestilence, the Great Mortality, or the Plague) was the deadliest pandemic recorded in human history. The Black Death resulted in the deaths of up to 75–200 million people in Eurasia and North Africa, peaking in Europe from 1347 to 1351.
