Review the section "Investigating Life: Heredity and the Hungry Hordes." As indicated in the images below, the dominant allele (R) confers susceptibility to the Bt toxin, and a recessive allele (r) confers resistance to Bt. Suppose that a susceptible male mates with a resistant female. They have many offspring, a few of which are resistant to Bt.

Biology: Chapter 10 Assignment Flashcards | Quizlet

10.4 Homeostasis. Before moving on to discussing the individual organ systems, it is important to review the concept of homeostasis. Homeostasis refers to the maintenance of a relatively stable state inside the body. Human organs and organ systems constantly adjust to internal and external changes in order to maintain this steady state.
