### **Computer Networking: The Complete Guide to Understanding ...**

A computer network is a group of computers, two or more, connected to each other through a wire or a cable or even wireless. You can share files with other computers this way easily. If the network is large enough and lets you access a large number of computers, it becomes even more useful.

### **Networking Tutorials for Beginners : Get Your Basics Right ...**

Early computer networks used cable to connect computers together in a wired network. Most modern networks use wireless (wi-Fi) as the main connection media and networks tend to be a mixture of wired and wireless. The diagram below shows a wired Ethernet network. To work each device must be connected to a Ethernet hub or switch.

### **Basic Home Networking Course for Beginners**

Wired networks use Ethernet over UTP cable and tend to be faster than wireless networks, which is an important consideration if you are a gamer. The simple wired home network diagram below shows a minimum setup with a switch and broadband router.
