“integrated science” course serves the purpose of a “general science” course covering both the physical and life sciences. These courses are “integrated” in that the fields of science are not compartmentalized. Biology, for example, is discussed in the physics chapters and elsewhere as is appropriate.

Science, and Astronomy. Fold these branches of science together and the result we call Integrated Science. The breadth of integrated science is made manageable through the use of Unifying Concepts— those big ideas that cut across all the sciences and unite them as one body of knowledge about the world.
