Construction equipment management refers to a company's ability to evaluate their construction equipment fleet and the fleet's costs on a consistent basis. Construction equipment management also involves taking a company's evaluation of their fleet and comparing it against their current projects. With this information, a business can strike a ...

Guide to Construction Equipment Management | Cat Rental Store

A construction equipment manager needs to be able to take practical decisions with regards to management of the construction equipment to ensure maximum benefits with minimal expenses for the company. Construction equipment should ideally pay for themselves by helping the owner earn more than it costs to own, operate, maintain, store and use the machine. Operation costs are a recurring expense based on frequency of use while idle sitting machines are a drain to the income.
