Field Guide For The Determination

The field office then sends the case to DDS to evaluate the disability. DDS is responsible for obtaining medical evidence and making the initial determination on whether that person, or a claimant, is disabled or blind under the law. DDS works to obtain evidence from the claimant's own health care providers first.

Ocular dominance, sometimes called eye preference or eyedness, is the tendency to prefer visual input from one eye to the other. It is somewhat analogous to the laterality of right- or left-handedness; however, the side of the dominant eye and the dominant hand do not always match. This is because both hemispheres control both eyes, but each one takes charge of a different half of the field of ...
