Concerns that face recognition could be used to invade privacy are valid; however, this is not how it is being used by U.S. law enforcement. To the contrary, law enforcement primarily uses face recognition as a post-incident forensic tool to enable detectives and analysts to generate investigative leads in violent and harmful crimes. In this article we explain both how forensic face recognition works, and how it is used by law enforcement in this country.

About Us | Oxford Wave Research

Automatic Speaker Recognition (ASR) has been an active area of research for the past four decades with speech collected mostly in research laboratory environments. However, due to growing applications and possible misuses of Voice over Internet Protocol (VoIP) networks, there is a need to employ robust ASR systems over VoIP networks, especially within the context of internet security and law enforcement activities.
