L&W Supply is one of nation's leading distributors of construction supplies and building materials. Find a branch location or access our tools and resources.

L&W Supply - Commercial Building & Construction Materials ...

The lift systems are simply designed, but they will fail after years of use or if not properly maintained. The majority of Viking campers use a Goshen-style lift. This system uses a cable on pulleys to raise the camper on springs. Some of the trailers have the option to use the lift automatically, while some use the basic crank handle.

Folding Trailer Parts

The Coleman camper lift system is a bit different from the above two. Here, the winch attaches to a powerful chain whose main function is to drive a threaded screw. This screw exerts pressure to a distribution block that connects to the telescoping poles on the RV corner edges via the lift cable. Replacing Your Camper's Lift Cables

Pop Up Camper Lift Cables: A Replacement Guide ...

L & W Crank - Older Jayco / Viking / Coachmen Pop Up ...

The Viking uses the L&W lift system, you will have to raise the roof and support it to gain access to the cables, once the roof is up and supported with 2x4's, the cables are routed from the lift winch to each corner of the camper lift posts, there is a removable panel at the floor line and under the cabinets to access the lift system, this is the system you have, same lift Jayco uses.

Can you send me a diagram of how the cables go on ... - ASAP

Online Library L W Lift System

There's no effort required to raise your camper top! Built-in limit switches stop your camper top at the desired height, and the winch stops in the closed travel position when you lower it. When lowering, you can stop the Camper Lift at any time to tuck in the fabric. The camper top will not drift up or down.

Camper Lift - Carefree of Colorado

The lift mechanism includes a base, a drive assembly attached to the base, and an elevation assembly attached to the base and configured for cooperation with the drive assembly. The elevation assembly is configured to operate between a lowered position and a raised position to provide vertical movement to the movable roof.

Recreational Vehicle Lift Mechanism - L&W ENGINEERING, INC.

The Goshen lift system is used by most of the pop up vehicle manufacturers. The cable is connected to a distribution block, enclosed in a tube running front to back under the vehicle frame. Within the tube is located a simple mechanism that utilizes one pulley to push four heavy duty springs through tubes routed to each corner of the trailer.
