Renfrew's definition (Reference Renfrew, Renfrew and Zubrow 1994, 3), cognitive archaeology is 'the study of past ways of thought as inferred from material remains'. It might seem trivial but is actually important to note that archaeology in general starts from material remains not because it attaches special ...

Read Online Mathematics In The Archaeological And Historical Sciences By F.R.

The earliest civilizations have left only archaeological and limited historical evidence that requires substantial interpretation. We have many mathematical treatises from the later civilizations, but these are usually in a completed form which leave out the development of the concepts and the purposes for which the mathematics was
