The Evolution of Path Dependence

Based on learning theory, this study introduces a distinction into three orders (zero, first, second) of path dependence. Applying econometric time series analysis (VAR models), we explore the order of path dependence in firms' investment, divestment and cooperation decisions. In extension to prior research, we not only investigate the order of path dependence for each type of portfolio ...

Evolutionary economic geography (EEG) can be seen as comprised of two main strands of literature, focusing on: path dependency, institutions and lock-in; and evolution, routines and complexity. Rather than viewing EEG as a separate enterprise, I suggest that there is a need to link evolution to institutional and political economy approaches within a theoretically plural economic geography.
